

## VISIBLE GOLD MINES LAUNCHES ITS INITIAL EXPLORATION PROGRAM ADJACENT TO PATRIOT BATTERY METAL LITHIUM'S DISCOVERY IN THE JAMES BAY REGION

Rouyn-Noranda, Quebec, Canada – April 8, 2022 – Visible Gold Mines Inc. (TSXV :VGD) (FRANKFURT:3V41) is pleased to announce the beginning of an exploration program for gold copper and lithium about 2.8 kilometres south east of Patriot Battery Metals' Corvette lithium trend. The CV lithium trend is an emerging spodumene pegmatite district discovered by Patriot in 2017 (see Patriot's press release dated March. 8, 2022).

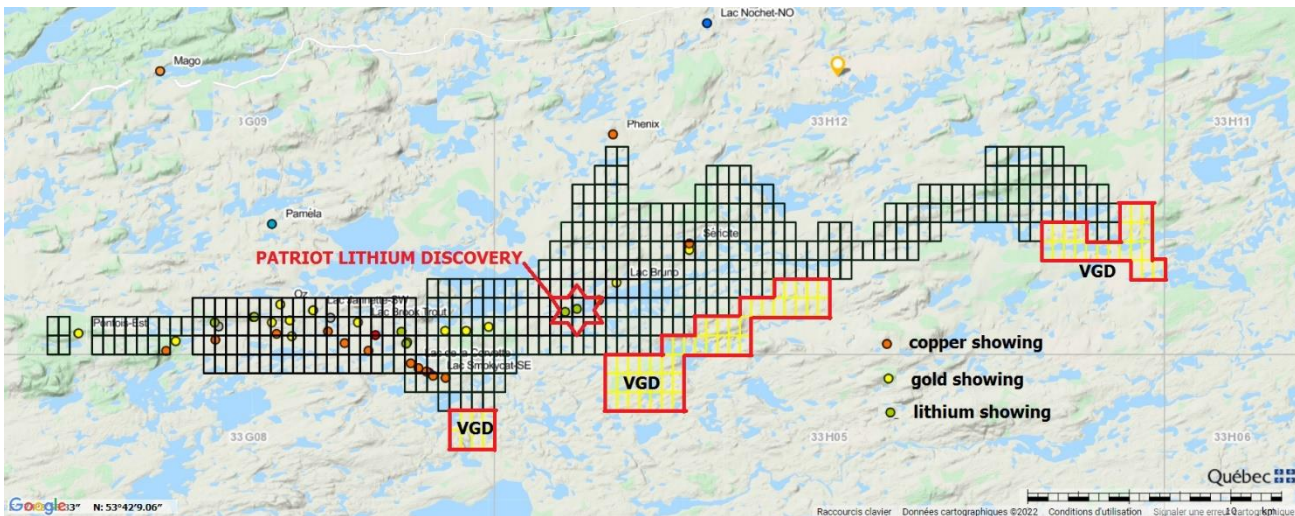

Situated along the La Grande Greenstone Belt about 30 km from the La Grande 4 hydro-electric power plant, high voltage power lines and airport, the property has the potential to host multiple deposit types. A technical compilation is actually under progress and will be completed in the coming weeks followed by a field exploration program early this summer to identify and sample visual outcrops.

Martin Dallaire, President and CEO of Visible Gold Mines stated, "Patriot's recent success are really encouraging and we just can't wait the snow to be gone to prospect our newly 40 square kilometres of prospective land"
